N/A = Undetermined data due to less than 4 years with annual means. This would occur if some (or all) years have more than 80% nondetects; other years may have insufficient data to compute an annual mean.

Trend period is 2003 - 2018 for all pollutants except for the following:

Napthalene and Benzo(a)pyrene: 2008 - 2018

Chromium VI: 2005 - 2012

Beryllium PM10 and Ethylene Dichloride: 2004 - 2018
